CAPITOL NOTES.

Minister Washburne—The "Peace" Policy—Stanley Matthews—A New Scheme—Removing the Capitol—Etc., Etc.

WASHINGTON, D. C., March 23, 1877.

EDITOR JOURNAL:—Dropping into the pleasant rooms of the Fifth Auditor at the Treasury yesterday, I met and became acquainted with the man whom of all others was my first choice for the presidential nomination at the Cincinnati convention—E. B. Washburne, our present Minister to France. Had Illinois not have supported Washburne as she should have done, we would have secured that nomination beyond a doubt, and had he been on the ticket I am confident that it would have received a majority greater than that given General Grant in '68. However, it went in another direction, and I cannot afford to lose any flesh over it. Washburne is appearing in much better health and spirits than when he went to France eight years ago, and was returned for the express purpose of insisting upon a recall. He goes back next month, but only to remain until his successor can be appointed.

Things have settled down very much in Washington as elsewhere since the late Presidential "unpleasantness." Especially here everything appears to have subsided into just two parties, those who want office and those who do not. While the former are divided into those who want to keep in and those who want to get in. Of course a great many of these patriots on both sides are doomed to disappointment. But notwithstanding this President Hayes appears to-day, outside of all strict political lines, to be the most popular man in this country. It is hardly fair to suppose him to be able in one month to heal the southern ulcer that has been festering for years and has thus far baffled all the political physicians. And while some may doubt the practicability of his course of treatment, it is but right that he should be given a little time to apply his new remedy, before it is judged.

A most valuable addition is made to the Republican party in Congress by the election of Stanley Matthews as Senator from Ohio. Mr. Matthews is a man of strict integrity and large powers, and will undoubtedly take a leading place in the next Congress. I notice that the Democratic support of the Legislature was given unanimously to Mr. Blank. What a world of trouble it would save the country and themselves if that party would only do all their voting in blank.

The new Secretary of the Treasury has under consideration the abolition of

States of the collections of the revenues. The plan suggested is to assess the States for a certain amount and let them collect the revenue in such a manner as they may deem best, and the suggestion is certainly one that merits consideration.

I see by my western exchanges that L. U. Reeves, who, next to the Hoosac tunnel, is probably the most celebrated bore in the country, is at it again. He resolves himself that the "National Capitol be removed to St. Louis." Now if he only said Wankago or Kenastru, or some other place that is down on the maps, but St. Louis! why, they haven't even got enough capital there to support a first-class base ball club. What St. Louis needs is some enterprising philanthropist to remove L. U. Reeves.

Under the new dispensation over three hundred distillers have abandoned their cricked and crooked and confused ways in Georgia and the Carolinas, and have confessed and received pardon. Amongst those things which this will most effect will be the reduction of whisky and the Democratic majorities in those States, both of which, I venture to say, will be largely decreased.

I notice that Illinois has been enjoying the unusual luxury of an earthquake and imagine by that that Senator Davis has reached the House and "got" down. Referring either to his debility or his avoirdupois. Judge Davis will fill a big place in the next Congress.

One of the first rules of business of the new President seems to be that no cousins need apply, he having this week refused to appoint a Mr. Stillwell of Livingston county to the Marshalship of the north district of Illinois, because his wife was a favorite cousin of Mrs. Hayes.

LOGAN.

WAR seems not improbable between China and Spain, the Chinese Ministry having refused to yield to certain arrogant demands of the Spanish envoy. With her vain and exhaustive efforts to suppress the Cuban republic, occasional revolts in the Philippine Islands, and frequent trouble with the smouldering fires of Carlism, the people of Spain have burdens enough to bear already. A war with the most powerful empire of the East would make those burdens insufferable. China is not the contemptible foe that she was a few years ago. The empire has adopted many of the methods of Western warfare, and Spanish invaders would, in all likelihood meet with a very disagreeable reception.

WILL GO AHEAD.—The Los Angeles Herald states on the authority of Gov. Stanford that the Southern Pacific Railroad Company does not propose to stop at the Colorado river and await Congressional action. It will go right along with its enterprise, cross the Colorado and build a hundred and forty miles of railroad into Arizona as soon as possible. Track is being laid at the rate of two miles a day this side of the river, and by the 15th of April the iron horse will take water from the Colorado at Yuma.

NEGOTIATIONS are pending for the sale of the famous Peck mine in Arizona to W. M. Lent of San Francisco. They ask \$400,000, and there seems to be some probability that it will be paid and the mine sold.

Messrs. Nichols and Ogle, rival candidates for the Mayoralty of Galveston, tossed pennies to determine who should retire from the race, and the latter has refused a nomination.

THE standard bushel of the United States contains 2150.4 cubic inches. Any box or measure, the contents of which equals 2150.4 cubic inches, will hold a bushel of grain.

THE play bill which President Lincoln is said to have held in his hand the night he was shot in the private box of Ford's Theatre, Washington, was sold the other day for \$4 19.

IT is said that the demand for ivory in England causes the death of 50,000 elephants annually.

DURING the year 1876 the United

It was a refreshing variation from the general run of speeches at temperance meetings when a man got up in Pittsburgh the other day and remarked: "Ladies and gentlemen, to bring my nose to this state of blooming perfection has cost me at least \$10,000."

ARIZONA is the coming country, but its too soon to go there yet. The country is overrun with poor people, and though the Apaches have been quieted, the twenty-dollar pieces are not yet ripe. What is needed in that territory is capital to develop the mines, and not a rush of fortune hunters.

CHARLES GAY of Iowa has been in the habit of jumping off bridges for a purse of three dollars. The price was so low that he couldn't afford to come to the surface when he leaped the other day.

ANOTHER OUTRAGE.

At Acapulco, on the 5th of March, and by order of General Jimenez, United States Consul John A. Sutter, Jr., was seized on the street by twenty soldiers and put into prison, where he still lies. It appears that a citizen of the United States, Henry Kastan, was ill-treated at the time the late change of Government took place, and Consul Sutter's remonstrances and protests against the proceedings were cause, or pretext, for his own imprisonment. A few days ago on the coast of Africa an outrage was also perpetrated on American citizens, which was promptly avenged by a British man-of-war. The United States should maintain a policy that would prevent insults to American citizens, and the Government should take immediate steps to redress the wrongs mentioned above.

Z. Swearingen, an old Nevada just returned from the Black Hills, called on the *Silver State* the other day. He went to the Hills three years ago and was forcibly taken out by the army, and at one time his train was burned by the soldiers. He considers the Hills rich in placer and quartz mines and that the north west and a portion of the east side of the hills are remarkably well adapted to agricultural pursuits. Three quartz mills are now running at Gayville, and two more are ready to start. A colony from Montana are engaged in farming in Spearfish valley, and will supply the miners with vegetables the coming Summer. The Hills are only partially prospected and at present no correct estimate can be formed of the extent or richness of the mines. The Indians are yet troublesome, and may continue so for two or three months.

Serious trouble is apprehended with striking miners at Scranton, Pennsylvania, and there is much excitement in that town. On the evening of the 17th instant a delegation of miners waited on the Mayor of Scranton, and their leader addressed that gentleman as follows: "We represent the starving workmen of Scranton. I have a family of eight children who have lived on bread and water for two weeks; now we have water, but the Lord only knows where the bread is coming from. We come to demand bread, and unless we have it within forty-eight hours we shall take it by fair means if possible, but by foul if necessary."

"LUCKY" BALDWIN'S little farm in Santa Barbara county, California, contains only 16,000 acres, or twenty-five square miles of territory. A road along the outer edges would be only fifty-two miles in length. A little patch of 5,000 acres—nearly eight square miles—is under cultivation, and the little farmer expects to get his whole farm under fence and cultivation by next Summer. In New York and Pennsylvania people would think that Mr. Baldwin had land enough for eighty large farms.

W. W. BIANCO, of Pioche, John D. Lee's lawyer, has the only genuine confession of the Mormon culprit. The written manuscript embraces over 800 pages of close writing, and will probably appear in book form in three volumes. It will amply repay for perusal, as it will contain the true history of the Mountain Meadows Massacre.

It will cost the United States \$10,000 for the evidence to be taken in the Senator Grover case. This is as high a valuation as Tilden placed on both Grover and Cronin recently.

Richmond's population, as estimated by the school census, is now 72,500—white, 41,400; colored, 31,100.

Mr. Evans' income is estimated at \$160,000 a year, but he has made half of it already this year by his service in the Vanderbilt will cases.

It is said that a body of high grade ore has been penetrated in the header of the Sairo Tunnel.

JAY GOULD drew \$1,280,000 dividends on Union Pacific last year. He voted on 183,750 shares.

MOST IMPORTANT ITEMS IN YESTERDAY'S DISPATCHES.

The Foster-Matthews' Bargain.

New York, March 30.—An account is printed of the meeting of the 27th of February at Wormley's Hotel, between Foster, Matthews, ex-Governor Dennison, Garfield, Sherman and others, friends of Hayes, and Ellis, Gordon, Levy, Watterson, Colonel Burke and other Southern Democrats. Ellis said that Louisiana wanted peace, home-rule, and honest government, and that the Democrats in the House were filibustering to defeat the count, under the apprehension that Hayes would sustain Packard and Chamberlain. Matthews replied as the personal and political friend of Hayes, that the latter believed the time had gone by when States should be upheld by military power, and if inaugurated his policy would be to give peaceful governments to the States, of their own choice. Foster showed a letter from Hayes endorsing the speech made by Foster in the House. Watterson said that the policy of drawing Federal troops from the States of South Carolina and Louisiana enunciated by Matthews was what could be expected. Senator Sherman, in response to a query from Ellis, said he approved and endorsed all the propositions of Matthews in behalf of Hayes. Next day the Foster Matthews letters appeared as a sequel to the above meeting.

WASHINGTON, March 30.—Judge Lochrane, of Georgia, had a long interview with the President last night. The Judge says the questions talked over referred more to Georgia State appointments than to national politics. He was impressed with the cordial manner of the President and was gratified with the result of the conversation. President Hayes was in his judgment an honest man, and would in proper time sweep out every official in the State who has clung to office by the adhesion of love for public plunder. The judge says some Democrats will have places, but they must be men who can popularize the Government. The President has made up his mind that his appointments shall come up to the standard of fitness.

SAN FRANCISCO NOTES. SAN FRANCISCO, March 30.—Wm. B. Bradbury, the well-known builder and contractor and proprietor of the Centennial planing mill on Brannan street, between Fourth and Fifth, was stabbed by an employe whom he was reproving for some misconduct. The wounds are in the side and neck, and are serious.

The anti-coolie element seems likely to play quite a prominent part in the coming Municipal campaign. The various clubs are already moving with the view of consolidating their strength and making themselves felt. It is understood that they will set themselves strongly against the Ring crowd and against the Brady and Mannix factions.

In the Pacheco-Wigginton case counsel have been granted till the first day in the April term of the Supreme Court to make questions of fact.

The U. S. steam corvette Lackawanna sailed to day for Mazatlan to inquire into the detention of the schooner Montana by the Mexican authorities.

The steamer Oceanic arrived this evening from China and Japan with 400 Chinese passengers, a greater number than has arrived on any one steamer since the anti-coolie excitement checked immigration.

Another Confession. CHICO, March 30.—A full confession has been made by O. M. Ames, the reputed organizer of the Laborers' Union. He confirms the reports previously published as to the mission of the "Council of Nine," stating that he joined the order for the purpose of exercising his influence against violence, and when he found it impossible longer to prevent it he withdrew. It appears from his statement that the Council of Nine has been simply a cloak to shield the Laborers' Union, and that the latter organization is properly responsible for all the crimes committed against life and property. He details the signs, passwords, grips and tokens of the order. Those who took the second degree in the Union were sworn to kill Chinese, and whites also, if need be to effect the extermination of the former. His confession details a state of affairs here that would be as utterly incredible were his statements not supported by other evidence.

was an exhibition by some thirty inventors of insect exterminating machines, which are intended to destroy grasshoppers by the million. Working models were exhibited showing how these pests could be caught, two or three acres at a grab, and then how easy they could be killed by knocking them in the head or pulling their legs off.

The day selected for this exhibition was a fortunate one, the birthday of St. Patrick, of blessed memory, who drove the snakes out of Ireland without the aid of labor-saving machinery.

CAPTAIN FRANK DRAKE informs the *Eureka Sentinel* that the tunnel being run by the Eberhardt and Aurora Company through Treasure Hill is now in a distance of a little over 1,000 feet, and that work on it is being pushed to its fullest capacity. The Captain does not expect to strike a ledge until about 1,000 feet more have been completed, when he feels confident of striking something pretty good. While running the first 1,000 feet they ran across two seams of good looking quartz, but they were only a few inches in thickness.

The sum total of railway lines through the principal countries of the world now reaches a distance nearly fourteen times the circumference of the globe, or one and a half times a journey to the moon. Of this total the United States' lines extend 75,585; Great Britain's, at home and through her foreign domain 66,101; Russia's in Europe and Asia, 35,911; those of France, 30,779; and of the German Empire 18,329 miles.

A SINGULAR but perfectly legal marriage was celebrated in Stockton. A couple went before a notary and duly entered into and signed a marriage contract, which was properly acknowledged and recorded, thus making the parties man and wife under the laws of California. Marriage is a civil contract and it matters not how it is performed so long as an acknowledgement and record thereof exist.

THE Virginia papers have succeeded in stirring up a lively row concerning the building of the new Fourth Ward school house in that place. Contradictory statements from interested parties will be next in order. The house cost \$51,000, when it only ought to have cost about \$20,000.

EX-GOVERNOR HENDRICKS, by the sentiments of his speech at San Francisco on Tuesday evening, seriously detracted from the good opinion heretofore entertained of him. He declared it was the duty of the people to accept Mr. Hayes as our *de facto* Executive!

SOME of the creditors of the firm of Erlanger & Hess having refused to sign the agreement accepting the proposition made of thirty-two cents on the dollar, the firm will probably be forced into bankruptcy.

THE San Francisco millionaires are building themselves grand residences. Mark Hopkins' will cost \$3,000,000; Charles Crocker's, \$2,300,000. Leland Stanford has expended \$2,000,000 on his new home.

THE Democratic State Central Committee of California have issued a circular addressed to Democratic officeholders, requesting them to subscribe to a fund of \$3,000 to pay off the debts incurred in the last campaign.

THE pay-roll of the Justice mine for the month of March will foot up nearly \$60,000. Good for the Justice.

J. G. EASTMAN, of San Francisco, is also a candidate for the United Senate on the Republican side.

THE Manchester butchers are buying up patriarchal bulls and matronly cows, which they kill and exhibit as real American beef, not frozen, retailing the tough carcasses at a low price. The customers, disgusted at the experiment of trying to eat the stringy meat, return and demand their "hold English roast beef," when the butchers supply them, at the old price, from American carcasses.

USURPER and aliunde—these are the big and comprehensive words which are left as a legacy to the American people out of the chaos of the Presidential complication.

GENERAL SHERIDAN says it is not his intention to parley with the hostile Indians any further, and that the campaign will be opened as soon as possible.

and friends have done for him, his wealth has been swallowed up in unprofitable speculations. It is said that, for two years, the President has anticipated his salary, every week, and drawn from the treasury the amount due him. Mrs. Grant, in speaking about her sorrow in leaving the White House, said that she had had more money while there than she ever saw before, and that she had enjoyed a rest from all the cares and worries of housekeeping, and felt a dread of again taking up the burden. Gen. Grant does not seem to have any business capacity, or he would be rich, with all the money he has received for sixteen years. If he had confined his capital to the purchase of government bonds, instead of allowing Mr. Tom Murphy, of New York, to invest it in real estate in that city and Long Branch, he would never have known poverty. It may not be true that he is poor, but such are the stories afloat.—*Washington Letter*.

A NUMBER of our exchanges have started a department of "original humor," and when the foreman, in making up the paper, erroneously places the comic paragraphs in the scientific column, and the scientific items under the head of humorous, the reader never discovers the mistake.—*Norristown Herald*.

GENT'S FURNISHING GOODS

—JUST RECEIVED AT—

GREY & ISAACS'.

—O—

We take pleasure in announcing to the ladies of Reno and vicinity that we have now received our entire Spring stock, which will be found upon examination to be most complete in every department, having been selected with the greatest care and taste. We can safely assert, without fear of contradiction, that ladies can now make their purchases at our establishment cheaper than the same goods can be purchased from any San Francisco house. Our stock is so varied and extensive that it would be useless to attempt to enumerate it, therefore we cordially invite the ladies to call and examine our vast and most elegant assortment of goods, being assured that at all times they will receive our most courteous and polite attention whether purchasing or otherwise.

Very Respectfully,
GREY & ISAACS.

New Irrigating Ditch.

A project is now under headway which will be of great benefit to this country. Surveyor Barker has just completed the survey of a ditch which is to be constructed from the Truckee river at a point four miles above Verdi, to Steamboat Springs. The ditch will be 33 miles long and of sufficient capacity to carry 4,000 inches of water, making it the most valuable ditch in the state. It will have a fall of eight feet to the mile, and the route surveyed is an easy one, though no estimate of the cost of the work has as yet been made. By means of this ditch an abundant supply of water will be afforded for irrigating several hundred acres of land which is now worthless, but which with water will make homes for many people. It will be seen that thus all the land east of the eastern base of the Sierra Nevada Mountains, along the line of the proposed ditch, will become of great value. The parties who are interested in this matter are Peleg Brown, A. M. Lamb, J. L. Downs, and other ranchers out in Steamboat Valley. Work is to be commenced immediately.

Church Days.

The coming month is an important one in the Episcopal and Catholic churches. Following is the calendar: April 1—Easter Day; 2—Monday in Easter Week; 3—Tuesday in Easter week; 4—First Sunday after Easter; 5—Second Sunday after Easter; 6—Third Sunday after Easter; 7—Fourth Sunday after Easter.
